is a traditional drafting and design application that competes with AutoCAD in the areas of 2D design and drafting, sectioning, project management, and collaboration.

Blender is a 3D modeling and animation application that is similar to Autodesk's Maya software. It is available for free from the Blender Foundation. SketchUp is a 3D design application that is similar to

AutoCAD, but was only partially modeled after AutoCAD, since it is intended for non-CAD users. It is free and available for Windows, Mac, and Linux. In 2002, Autodesk was acquired by the private equity firm of Bain Capital. Autodesk is also a rival of Bentley, another product made by the same company.
