Use of Python for AutoCAD automation was demonstrated at a 2012 Autodesk webinar Infographics Autodesk provided AutoCAD Animation in the form of Adobe Flash in 2013. AutoCAD Plugin Manager Autodesk provided AutoCAD Plugin Manager (ACPM) (licensed to the AutoCAD Users Group) that enables users to discover, install, configure, and use add-on products from the Autodesk Exchange Apps store. ACPM debuted in October 2008 and initially included functionality to detect add-on products that could be installed on the computer, and install them. ACPM was the primary means to add-on functionality to AutoCAD until AutoCAD Architecture and AutoCAD Electrical were released as the official applications of their respective software segments. Silver(0) supported cobalt nanoparticles were successfully prepared by a one-pot hydrothermal method with polyvinylpyrrolidone (PVP) as a stabilizer. The Ag(0) supported cobalt nanoparticles with an average size of 4.5 nm were characterized by X-ray diffraction, transmission electron microscopy (TEM), X-ray photoelectron spectroscopy (XPS), UV-Vis diffuse reflectance spectra, and X-ray photoelectron spectroscopy (XPS). Then the obtained Ag(0) supported cobalt nanoparticles were used as photocatalysts for the degradation of Rhodamine B (RhB) under solar light. The experimental results showed that the Ag(0) supported cobalt nanoparticles were highly efficient for the photodegradation of RhB under solar light. The increased first-order rate constant of the catalyst is 200 times higher than that of the Co(0) nanoparticles without surface modification and 10 times higher than that of the TiO<sub>2</sub> nanoparticles.
