Elcomsoft Blackberry Backup Explorer Crack+

Elcomsoft Blackberry Backup Explorer is a comprehensive and effective software solution that comes in handy for users who need to extract data stored in Blackberry backups such as messages, call logs, contacts, ringtones, pictures and attachments, to name a few. Since these backups contain important information stored in Blackberry devices including web browsing history and cache, appointments and MMS messages, Elcomsoft Blackberry Backup Explorer provides you with a simple means of getting access to such data with ease. The main window of the application is user-friendly and enables you to open an existing IPD / BBB file (Blackberry backup file), then export all the data to PDF, HTML, RTF, TXT or DOC format. However, you need to make sure that your computer contains all the required apps, otherwise Elcomsoft Blackberry Backup Explorer won't recover your data. Only if Blackberry Desktop Software is properly configured, the application will automatically detect the location of the backups. Because the program comes with a multi-tabbed interface, you are able to navigate through messages, contacts, memos, calls, tasks and MMS messages effortlessly. After that, you can choose only the data you are interested in and save it to whatever output format you want. One important feature of the application is that it can also access encrypted data stored in password-protected backups. It grants access to information stored in Blackberry devices by easily recovering the plain-text password. For advanced users, Elcomsoft Blackberry Backup Explorer comes with support for command-line parameters in order to perform batch conversions. This way, you can convert multiple files to the output format you are interested in. To sum things up, Elcomsoft Blackberry Backup Explorer proves to be a steady and reliable utility worth having when you need to recover important data from Blackberry devices and store it to your computer. Elcomsoft Blackberry Backup Explorer Key Features: Recovers all Blackberry device data including messages, contacts, MMS, call logs, notes, tasks, notes, and others. Recovers all data stored in password-protected Blackberry backups. Recovers all data stored in Blackberry devices including web browser history, MMS, and cache.
