In second table has just name field. I have run my autocomplete function using ajax but it is working only for first table. Is it possible to run a autocomplete function for both tables? A: You need to use the focus event to populate it on the second table. As far as I know you can't directly trigger the event of that table using the autocomplete, you need to do this indirectly by: re-pop

OMNIC is a piece of spectroscopic (FTIR) software for recording and analyzing spectra in bulk or single. OMNIC is an advanced software package for FT-IR spectroscopy that allows you to perform a wide range of tasks, from . OMNIC is an advanced software package for FT-IR spectroscopy that allows you to perform a wide range of tasks, from recording spectra to analyzing.
