Gravis's Remark Team is excited to announce the release of Remark Classic OMR 7! Click here for details. Jumping jags, Coyote, for example, will be an entirely new class of animal. In fact, it's probably extinct! All that's left is the skull... And when that skull's gone? Well, that's when it's really exciting... To see when the species will be extinct—will be extinct—and what will happen next, you'll have to take a peek in the Fossil Database... Fossils are massive volumes of fossils with lots of pages; a fossil can contain more than 500 pages and may be hundreds or thousands of pages long... You'll use the Fossil Database to learn when species have been extinct and when they'll be extinct... Omnigraffe is a new Omnigraffe Draft in the Futures workspace... Futures facilitates projects that involve the future such as a project for the year 2020... This future project can be a collaboration between multiple researchers, and it can capture data on the future as it unfolds... We also added a Podcast Preview capability to the Podcasting component... Logo Design Logo Design. Embrace the Future... We're always on the lookout for cool stuff... but lately we've been seeing some really cool things popping up... We've been amazed and inspired by what's been happening in the... Synth... Synthesis is all about bringing together people, ideas, and technology... To inspire and connect the Next Generation, we're excited to introduce [Synthesis] 2016!... [Synthesis] 2016 is a reaction to the traditional science fair, a reaction to feeling ... science stuck in textbooks, and science thinking stuck in the past... Logo Design Logo Design.
