Skin Pack Development Kit was viewed 997 times by visitors since its last update on 2016-03-23 and they rated it 5.0 stars out of 5. Skin Pack Development Kit is an easy-to-use software solution for creating desktop themes and skins. It is designed to provide users with everything they need to design a great-looking theme. Features: Create and modify themes You can create themes for the desktop and for mobile skin packs. Mobile skin packs are pre-optimized for speed and they have all the same features as a theme for the desktop. Icon and cursor setting You have all the necessary tools to create custom icons and cursors. Move, scale, rotate, resize and create custom cursors from scratch. Skin setting When you create a theme for the desktop, it comes with a whole bunch of tools and customizable elements. Create background images, theme colors and themes, change the overall visual style, change the appearance of the taskbar, set the default sounds and more. Setup package If you are planning to sell the theme to other users, you can use Skin Pack Development Kit's setup package feature to create a setup package for your new theme. This way, you will be able to extract the theme and install it with one click. When you are done with customization, you can immediately export your skin for MacOS, Win and iOS. Customization settings You can use the toolbox to customize your themes and create windows and gadgets. Pick multiple items and drag and drop them onto the screen. Tamper-resistant You can protect your skins from tampering by using signature files. You can also add error messages, copyright pages and more. Skin Pack Development Kit Skin Pack Development Kit is a standalone toolkit that comes with all the tools you need to create themes and create skins for Windows, MacOS, Win and iOS. It is designed to provide users with everything they need to design a great-looking theme. Summary: Skin Pack Development Kit is a
