SymbolCAD is an automated way to design symbols. You can add new symbols (shape or text), edit existing symbols, change their colours or add a background and, if the source image is available, scale or rotate the symbol. You also can add a layer to a symbol and make it the foreground or background layer. SymbolCAD comes with many pre-made symbols and you can create your own. You can copy and paste an existing symbol to create the same symbol in other layers with one click. You can use SymbolCAD to create graphical notation to describe the function and structure of your circuit or mechanical drawing. SymbolCAD Features: SymbolCAD is an easy-to-use software that allows you to: - Add new symbols: Shape, Text, Background and New Symbols - Edit existing symbols: Scale/Rotate, Re-size and Change colours - Add new text annotation: Text to symbol, text to path, background text, and masking - Add layers: Use symbols on layers or use as background - Export Images to: TIF, PDF, BMP, JPG and EPS SymbolCAD size: 32.0 Average Customer Review | 0 votes Customer Reviews by Robert Chan This is a good software if you need to show people drawings created in other software or you use it for creating graphics for websites. I like that you can keep track of how many symbols you have, number of symbols per page, average size per symbol and printing settings. There is a bugs though. Sometimes when the software updates, symbols don't show up in the designer or when you create a new symbol, it's missing. by wolverine Excellent! by Argeis Phillip . by Gabriel Gutiérrez I used this software on 3 projects to use different symbols on each. The software is very easy to use and it helps a lot to maintain graphics consistency, in the way they are inserted. by Andrew Handy I use this a lot to create logos and give the look of normal symbols a new twist. by Ray I really like this software. I use it to create logos and symbols for a web site I'm designing. It's much better than Word and I can crop the images easily by using a grid. When importing images it gives you the option to scale the images to fit
