Category: 2018 Kerr Park has received an upgrade this year. You can now use your own smartphone to pay for parking when it comes time to leave. This is such a unique concept that it will not only reduce the stress of paying for parking but also to keep people around all the time. Mobile pay systems are a solution for outdoor parking because they ensure that you are the boss, and it's not someone else telling you what to do. By setting up your smartphone to accept payments from ... With just a few days left in the year, people are able to get some nice discounts for various events. The annual dates for people to start looking for these discounts include November 26th and 30th, and some people are reporting that they have found extra savings. This is coming at a time when it has been cold in the Twin Cities all winter long. Discounts have been placed on tickets for the Minnesota State Fair and the Minnesota Wild, for example, so those who are ... With the Twin Cities being the capital of the United States, you would think that the U.S. Government would be well taken care of. That's not the case, however. The Twin Cities have been the home of many government employees, and they have found a way to keep them entertained with a program called the Summer Festival. With some money coming in from lots of different government departments, the Twin Cities are able to put on a show that is the best in the nation and features ... A new business has come to the Twin Cities in a neighborhood that has been marked by some redevelopment. Whether you are looking for more space or to make some money, you might want to check out this new office. The Twin Cities real estate developer was responsible for the construction of the mall that carries the name of the Big O's. The renovation of the building

Window Resizer is a program for Windows XP / 2000 / 7 / 8 / 2008 R2 / 10 (x86). The size and position of windows can be controlled, so that the entire screen can be used by the applications that are running on it. Adjust the hotkeys you want to use and the hotkey that will allow you to save all of your previous options. Change the size of the window and the position on the desktop. Window Resizer will restore the window to its previous sizes and positions for you. Window Resizer 4.00 Change the size of the window and the position on the desktop. Summary Window Resizer is a small, portable application that enables you to save the dimensions and position of windows that belong to specific processes, and then restore them at any time with a configurable hotkey. Fully portable app that runs in the system tray Not only does this program not need to be installed, but it also saves all its data in the root folder. No files will be stored in other locations, and no new registry entries are created on launch or shutdown. Window Resizer only runs in the system tray, so it is very unobtrusive. It lacks a standard GUI, but you can close the app from its tray icon and control it with configurable hotkeys. It also includes a settings menu for executing certain adjustments. By default, the key combination for saving window properties is CTRL+ALT+S, and the hotkey for restoring them is CTRL+ALT+R. There is also a combination for restoring all previous changes, which is CTRL + ALT + T. Very easy to use, but a bit more difficult to configure The application saves both the position and dimensions of a window, and you can use the assigned key combination to restore it to its previous size and position on the desktop. It might have helped if users had the option of only changing the window's dimensions while leaving it in the same place on the screen. Also, it is not possible to only alter a window's height or width. It is worth noting that, in order to modify the default hotkeys, you need to access the Settings menu. The process isn't difficult. It's novice-friendly. Manage your windows more easily with this lightweight tool In short, Window Resizer is a simple but useful app that enables 09e8f5149f
