Though iTunes could do most of things you need to be done for managing your iPod, it is still not a perfect tool. Meanwhile, some people do not want to invest themselves to learn iTunes, and they just want to get the ability to put the music, photos, videos, and so on back to iPod, and enjoy the music on iPod wherever they go. iPod Converter for Mac enables the users to do it with as few steps as possible, and you will never worry that you do the job incorrectly. The new features of this version are as follows: - Support for converting to 128Kbps MP3 format - New interface with iTunes Match enabled - Support for importing and backing up photos, pictures and videos from external devices - Improved searching functions, which makes it easy to search your files - Ability to change the file size during conversion What's New in Version 2.4.4: - Support for converting to 128Kbps MP3 format - New interface with iTunes Match enabled - Support for importing and backing up photos, pictures and videos from external devices - Improved searching functions, which makes it easy to search your files - Ability to change the file size during conversion How to use: 1. Select the folder where you want to convert iPod, set the output path and then click on the 'Start' button. 2. Preview the file list of iTunes on the left. You can also use the 'back' button to move to the previous folder. 3. Select the video files you want to convert, check the tags you want and click 'OK' button. 4. After the conversion is finished, you can click the 'Open Folder'

What's New In?

USB Watch allows the user to scan removable drives or USB hubs (such as built-in flash card readers) for dangerous programs. USB Watch restricts access to the whole device's content with a password. The device is still accessible through the USB bus, but the user cannot access the content unless the password is supplied. USB Watch protects portable USB drives, USB hubs (such as built-in flash card readers), or network share drives against these program infections. The program even has the ability to repair an infected device with only a few clicks (if the infected device is not connected to a computer). Detailed information about USB Watch: USB Watch allows the user to scan removable drives or USB hubs (such as built-in flash card readers) for dangerous programs. USB Watch restricts access to the whole device's content with a password. The device is still accessible through the USB bus, but the user cannot access the content unless the password is supplied. USB Watch protects portable USB drives, USB hubs (such as built-in flash card readers), or network share drives against these program infections. The program even has the ability to repair an infected device with only a few clicks (if the infected device is not connected to a computer). Watchlist management features USB Watch includes a set of features and tools to be able to quickly delete files from USB drives and USB hubs. USB Watch allows you to store and manage watchlist entries and to easily scan, remove, and update your watchlist. Watchlist With USB Watch, you are able to store watchlist entries that you might have found on a USB drive, such as Trojan horse programs, spyware, and viruses. Watchlist entries can be created and removed on-the-fly by copying or moving the suspicious files to your USB Watch. On-the-fly protection You can use USB Watch to protect portable storage devices against malware and spyware. The program will launch and inspect the drive for any suspicious or potentially malicious content. The program will scan the drive for viruses, trojans, and spyware and then erase the file. USB Watch can remove those programs in two easy steps: It will scan the drive with its built-in virus or spyware scanner and if any suspicious/malicious program is found, the entire drive will be formatted. USB Watch can repair a damaged drive, which will immediately be available for use. Easily scan removable drives USB Watch scans and

System Requirements:

-OS: Windows 7, Windows 8, Windows 10, 32-bit -Processor: Intel Core i3 -RAM: 2 GB -Graphics: Intel HD 4000 -Hard Disk: 30 GB -Audio: DirectX 10.0 How to Install? 1. Extract the files 2. Burn or mount the image 3. Copy the cracked content from CODEX folder to the main game folder 4. That's all. Enjoy! YOU MUST HAVE THE ORIGINAL GAME
