Microsoft calls Windows 10 the most intelligent operating system in the world, and the video game industry isn't afraid to take that claim and run with it. On Tuesday, Ubisoft announced a new Xbox One platform called the Xbox One X. Like many of the current generation of games consoles, the Xbox One X features 4K graphics along with a hybrid power supply, capable of managing both power and heat. Microsoft calls this the "world's most powerful console." The Xbox One X has the same insatiable appetite for power as the Xbox One S, except that it's using an ATI XFX power supply system. This is a standard PCI-E power cable that's connected to the Xbox One S power supply to deliver enough juice to both the Xbox One X and the Xbox One S. The Xbox One X has a very powerful graphics processor (aka GPU), but that doesn't mean it's a graphically impressive machine. At launch it's got 8

This tool is even better than I had hoped. It is a great tool, and it works as advertised. I would recommend this tool to anyone. LinuxMCE takes the cake and is not the only tool of its kind. But it does take first place for its beauty and simplicity." ++++++ "Hey, I've installed your Kibup tool. I've written a review to help you reach to more users with your tool. Read it, you won't regret it." "Once you create this script you will never go back to another tool" "But... I have one question: Kibup, only backs up data in FAT32 format? WTF? Are you blind??? Does it make sense?" "Nope, not blind at all. And YES it makes sense, it is a FAT32 drive you are using. And this tool does exactly what is should do, it backs up data from FAT32 drives, you can keep your BSD / Mac partition if you want, it has nothing to do with LinuxMCE or anything else." "All you need to do is this:1 - Download Kibup.2 - Create a backup script under /home/username/scripts.3 - Copy and paste the script in /etc/cron.d/ and set the backup frequency you want.4 - Start cron and enjoy your backup." "If you wish to change the backup frequency or script, just edit that file and tell it to run every X minutes / hours / days / what ever you want. It is totally the user's choice and you can change the script every time you want." "I'm giving you this information to make you aware that other tools like boxtool2 will backup only ext2/ext3 drives, WUBackup, can only backup fat32 drives, Dcut,
