AutoCAD is available on Windows, macOS, and Linux. It requires .NET Framework 3.5 or later, and is available in both 32-bit and 64-bit versions. Approximate list price: \$14,719 USD (as of July 2018). This article covers AutoCAD 2016, the most current version of AutoCAD, as well as its mobile, web, and cloud versions. Authors: Amit Kesh (amit.kesh@gmail.com) Sean Rogers (sr\_autodesk@hotmail.com) AutoCAD 2016 introduced a "Python scripting environment," which enables developers to automate tasks with code. The user interface allows users to build commands and create macros that can be run without needing to open the application's GUI. The Python scripting environment includes Python 2.6.7 and 2.7. The Windows and macOS versions of AutoCAD do not support Python 3. These versions of AutoCAD run on Windows 7, Windows 8, Windows 10, Windows Server 2008, Windows Server 2012, Windows Server 2016, macOS 10.6 and later, and Linux Ubuntu 13.04 and later. The Windows versions of AutoCAD include Python for Windows (64-bit) and Python for Windows (32-bit) (versions available in your Windows Control Panel) and the macOS version of AutoCAD includes Python for macOS (64-bit). AutoCAD's "new" user interface is based on the ribbon interface, and features ribbon panels on the left and right side of the screen. The ribbon panels feature drop-down menus with many options available, with some available on a global and individual sheet basis. AutoCAD's UI can be customized by users with the installation of templates, but users may also create custom templates. The Ribbon UI uses an Appearance Manager to allow users to hide panels and adjust the size of the UI. With Ribbon panels, users can: (default) hide or show the panels adjust the size of the panels change the color of the panels Adjusting the size of the Ribbon panels is done via the Appearance Manager. The Appearance Manager

**System Requirements For AutoCAD:**

Note: You will need a modern operating system for this game. This game is intended to work with Windows 7, Windows 10, and macOS 10.9.3 (with a few caveats) Windows and macOS may have problems if you have 32 bit plugins installed. 32 bit plugins will not work with the patched game files. You must have enough free hard drive space to install the game. A 2 GB install will be enough. If you plan to play with one monitor, you will need to install the game using only one monitor.
