Enter the license key Click on "Copy product key" Click on "Add". Now you should have the license key for Autocad. Go to "C:\Program Files\Autodesk\AutoCAD\2017\Autocad.2017_with_Keygen_for_Windows.exe" In the field "license_key", you should find the key you just generated. Note: If this does not work, open Autocad and try to reinstall the autocad. Q: how to get the number of a row being viewed in sharepoint 2013 list I have a view with the following URL: I can use this URL to view any of the columns that have a filter applied to it. The thing is that if I change the view and the columns I am changing, the URL changes as well. I can find the list id by clicking on the URL (I get "the list view id is blah"), but I am looking to get the number of the row being viewed. I need this number because I need to get the current url by using my ID and GET this URL: Where "1" is the number of the row I want to view. I don't have any control over the URL of the view. Can anyone help me with this? A: You can try using a GUID or a big random string as the ID to get the row number of a list view: If you do use a random string: Then your url will look like this: So you can just parse that out in your script. PHOENIX -- A federal appeals court refused on Tuesday to halt President Donald Trump's executive order on immigration, which had halted all refugees entering the U.S. for 120 days and banned travel from seven Muslim-majority countries. Trump had suspended the ban at the direction of the 9th Circuit Court of Appeals, but later reinstated the ban, which will now remain in effect for a week. Shortly after the ruling, the White House said the order will remain in place, adding that the administration would not obey the ruling. Get Breaking News Delivered to Your
