Kahner (2006), Fluid channeling in the study of *Aspergillus*. nematode sera, aspartate aminotransferase (aspartate aminotransferase).Q: NSXMLParser Change XML file locations I would like to change the location of an XML file while parsing. This is because the XML files location changes regularly and it causes problems if the NSXMLParser attempts to parse from the one it usually reaches. How can I change the XML file locations so that they match the URL passed to the NSXMLParser? A: You

should use NSXMLParser in mode "relaxed parsing" by passing "-c" option. NSXMLParser *parser = [[NSXMLParser alloc] initWithContentsOfURL:url]; [parser setDelegate:self]; [parser setShouldProcessNamespaces:NO]; [
