Localization: Hunt the Thief is an action-adventure roguelike game with elements of roguelike and top down shooter. The hunt is on. The local police is after you because you defeated their latest gang. They have taken their revenge and now want you dead. A special investigative squad with old computers tried to find you and they failed. They only managed to send you the name of the killer: «Fuck You, You Killers!». You may not have an idea what this hunter looks like but you will soon find out. The German Secret Service will hunt you down in the most unusual locations. Fences, broken locks, thieves, fences, and ghosts from the underworld. Play to survive. Hunt the thief. Hide yourself. Survive the hunt. Will you make it out alive? 1348 Hacker, Nihilist, Thief, Nerd, Gamer Also available on iPad, iPhone and Android How to play: The game consists of a single continuous map. You can move freely but it's better to stay in one place. Hit the keyboard keys in order to move. Shoot the enemies by hitting the "> " key. Use the "= " key to cast spells. There are only three kinds of enemies you may encounter: thieves, hunters and bad guys. Thieves steal from you without any regard. To stop this, you need to destroy the visual and/or audio components of the thief. This makes him lose concentration and you will get the gun lock. Hunters are very hostile and very fast. The only way to survive is to position yourself carefully in the environment. They can see where you are, so you can't hide from them. If you are spotted, it is game over. Bad guys are aggressive to thieves and ghosts but not to hunters. They will try to kill you with a bow, gun, melee, throwing knives, crossbows, and magic. Do you think you can fight back against all the enemies? ## Features Key:

Music and lyrics stored in mp3 files.
Many custom tracks made by users at SilentBomber.

The goal of the game is to play good melodies to get a large amount of money. To play nicely, each note must be at the correct times (e.g. hits must hit when the note starts, ties must hit when they ended and no note can be hit more than once).

Play the Musical Notes to collect musical notes. Each note loses one musical note. Collect enough notes and you will play the musical instrument that corresponds to the notes you played.

The silent geek packs a few of tasty C/C#/D/E/F keys into the instrument.

C/D : Reverse the order of notes.

F/E : Play notes other than the ones you've played.

H/L/P/R : Reverse the notes played up to that time.

K/M/M/X/Z : Fix the speed of the notes.

N/O : Toggle pause.

Q/S : Toggle the selection of the current note.

U : Adjust the tempo to the specified speed.

V : Toggle automatic repeat.

W : Toggle the note played when the previous note on keyboard is played.

X : Toggle volume.

Y : Toggle the ability of the notes to be played on next notes.

Z : Create/delete the loop notes.

Enter : Enter the game or quit.

A : Go to the end of a song.

B : Change the beat.

P : Replay the last song.

I : Ask for user input.

## What's new in Music Thief:

**While Jack White’s third solo album Blunderbuss sounds a little like last year’s Searching for Sugar Man—albeit with an even more abrasive texture—it’s a much deeper dive into a mysterious side of the former Genn Records figure. It’s also the first time White’s written a record as a leader, releasing it under his own label, Third Man. Full disclosure: as NPR’s Pop Life host All Songs Considered producer Mark Johnson, I’m pretty big into Jack White and have been since I first listened to him perform live on KCRW in the run-up to his first record, White Stripes, in 2001. Once he got his own label and started making solo albums, I became a huge fan, as they always seemed to project the right balance of emotion, power, and musical breadth. Specifically, I’ve been a fan of White’s solo work for almost his entire career. His albums on White Stripes records sounded a lot like the clean and laid-back rock of The White Stripes, only at a 20 percent higher velocity. But over the past dozen years, the albums that came after — The Raconteurs, The Dead Weather, Blunderbuss — have made him a fully post-Stripes Jack. Over the past decade, White has gotten away from his old stomping grounds of Detroit and Nashville, with albums bearing influence from the Pacific Northwest, Europe, South America, and even psychedelia. On Blunderbuss, performed by a full 15-piece orchestra, he’s blended those places into one strikingly beautiful dream. That’s not to say he hasn’t made music that sounds like Earth, Wind & Fire during the early ’90s. On the album’s first single, featuring Jason Isbell on vocals, Jack gives a pretty accurate account of why he’s become a contemporary R&B singer-songwriter. In all its best forms, music is about feeling. So why don’t we feel the same when we listen to it? On All Songs Considered, I spoke with White about how he made Blunderbuss, what he hopes listeners walk away with, and how he compares it to Searching for Sugar Man, his acclaimed 2013 record telling the story of an artist who went missing in America in the 1970s.**
