After trying a smile for the first time, an incredibly beautiful girl asks him out on a date. Once the date becomes the first day of the school year, Marcus comes to realize how pathetic his average grades really are when compared with the rest of the students in his school. Fortunately, Marcus meets another girl at the bar before he heads to school and decides to befriend her. As a part of the terms of the agreement, she agrees to tutor Marcus in French. In between the days of practice and the real test, Marcus finds himself busy with interacting with other classmates and making plans for the school dance. On the day of the dance, Marcus does not show up at his house, and soon enough, his younger sister, Lexi, finds out. Through these five different girls, Marcus starts to learn about various human relationships, and himself. He learns that he is better off not forcing himself to love someone, that sharing time with someone he loves is enough, and that people can be friends

1) The first level is really easy, some ammo and a hand gun. 2) The second level is ok. You have an automatic rifle and a rocket launcher. 3) The third level is also ok, every crazy zombie will be kill in an instant. 4) The fourth level is really, really hard (at least for me, for you, it's only hard to get the rocket launcher on the first level). One or two zombies are easy to kill. It's a time machine thingie. Conclusion: To many more zombies and hmm... let's say another part of Fort Zombie. Gameplay: 1) Sorry, another part. 2) It's also a time machine thingie. 3) Zombies appear from everywhere. You don't have a'super' weapon, you have only a rocket launcher. 4) Some zombie is able to jump over the fire. No explosions! Conclusion: Another part! To install it: 1) Unrar. 2) Install the game and give it permissions to write. 3) Run the game and... you're done! This game is free of course, and I'm very sorry for this extra part, but I had to test it on a MP3 player. UPDATE: The Let's Play from Revocane is in progress. Do not download the full version yet.
