This document is a pre-proposal for the configuration of X-Force X-tra Fast Key..Q: How to get query string value in Django? I am working on a project, where i need to show a pop up dialog window on clicking any of the submit button. This should show the details of the record that is selected from the querystring. For example, in the below html, what should be the query string value, if i click on the submit button with id = "dispatch" or id = "lost": Here is the partial view code: def dispatch_action(request): """ dispatches a
