ABOUT YEN SATORI -Game Producer Comments from the Press: "Amazing, this is a must-play game." -Dragon Magazine "Snows1a has his magic touch." -Games in Asia About the game "Fate is a free online role-playing game for PC based on CFATS." Mission The lands between war and freedom are sealed off from the rest of the world. The fate of all people is in the hands of those who hold the power, the Magic Clans, the Evil Evils. The First Clans Early in the history of the world, the Magic Clans were born. They fought with great savagery, and became the first Clans. As the countries increased in size, the warring among them began. The Second Clans The Peaceful Clans were born in the second-half of the Third Age. They were the people who offered protection to the poor and weak, and restored life to many lands that had once been barren.

Anonymous | 16/10/18, 20:22 Wow, I have been waiting for this game for a long time, now finally I have an action RPG. Its awesome. The game is really worth it, It has a huge storyline, It takes ages to finish it because you are engaged in the story. Relax. Enjoy every scene. Enjoy the narrative. GOOD GAME Widow | 16/10/18, 19:19 Ummm its game about fantasy no the thing its about making fantasy. Its story about story. It's not very exciting. It's like a survival game/choose your own story in Y:The Last Man. The story is boring, it doesn't have a very good ending, it's really boring, I really like it. Brenton | 13/10/18, 23:21 | love this game. The game overall is great, But the story sucks. The story isn't very good and it's so boring. I like it. Leon | 14/10/18, 09:12 | love this game. I recommend it to the ones who likes fantasy stuff. Yaaayyyy /u/rarestace! | 17/10/18, 14:21 I'm really sorry but I have to give this game at all,I don't like the characters,the story and the gameplay. This game is an action RPG in general, and I don't like it.I think it's not an action RPG. I've met people who says this game is good, but the character didn't like it. I feel bad about that. I hope you can like it. It's really frustrating. I've to end it like this.: (Brenton | 20/10/bff6bb2d33

Fantastic loot system! More Stat points in stats, but only a certain amount needed for certain stats to increase on monster kills, etc. All players start with an Assault Rifle for Guns, as well as some small amount of Health, Magic, or Stamina, to get them through the early game. Also, different weapons hold loot, as well as come with passive skills that are only unlocked through grinding, to gain those high end items later, such as weapons with more health. Magic or Stamina potions can be bought from NPCs, or gained through quests. They can give you temporary bonuses to your stats, and restore health or magic if you run out. Stat gems! Stat Gems appear at the site of battles. They are acquired by killing monsters and plundering their bodies for loot, so that you can imbue them with XP (experience points) in order to increase their level. Once level 100, they can then be used to increase your stats up to a certain amount. Each gems has a different range, some require a lot of XP, some require a lot of the stats. Level 100. A list of the stat gems you can buy and their stats, for all of the stats, including the starting point, and how much of each stat you can have at level 100 Str: Int: Dex: Luk: Eva: Total: 10 + Stat Upgrades. Stats can be boosted up to + 5 for 10 or 100 depending on the stats and leveling up the stats are not the only benefits of stat gems. Some of them also increase the chance of finding a rare item from plundering dead monsters. By increasing the amount of the stat gem, more chance to find an item. Drops, Each statistic gem has a chance of dropping a piece of loot. This chance is dependent on the stats of the gem, the level of the gem, and the stats of the monster you are fighting. Each gem has its own rarity as well, ie, 1 of each or 1 of each 2 of each, so if there is a 1

] used a similar recall in their metatag detection. In our methodology, we ignored the matching relation between the annotator and the sentence. If we are interested in the matching relation between the annotator and the sentence, we need to classify more classes. The additional classes are *Annotator child*, *Gap* and *Sum* and all the mentioned classes are used for the *scenario 5*. Table 5 reports the F1-score for the classification of scenario 5 based on the different features and the different methods. The feature FP:PR of the *FlexPro* method which benefits from the overlap in the features between the predicted tags and the annotated tags is the best feature set for this classification scenario. \[tab:relwork\] Conclusions {#sec:discussion} ========= In this paper we present FlexPro, a framework for predicting metadata for factual sentences. It encodes the relationship between predicted tags and annotated tags by using a classifier called *FlexPro*. Our framework can handle incomplete and erroneous annotations, by using a partially supervised classifier, such that predictions for those values are learned. The framework can also exploit textual features from the sentences to improve the performance of the classifier. The applications, given in section \[sec:applications\], show that the information contained in the predicted tags can be used to enrich a knowledge base for statistics and ontologies, and to document facts for annotation with metadata. Future work will be focused on the annotation of the Ontology of Microbiology Metadata (OMIM) and on the annotation of a set of open-domain scientific abstracts. Acknowledgments ========= This work has been supported in part by the European Commission under the projects MetadataPAD - - funded by the FP7-ICT-2007-C project under grant agreement number 222338, and by the project *Knowledge in Human Paleogenetics* - - funded by the EU under the FP7-ICT-2010-C project under grant agreement number 238121. We also want to thank Edoardo Fanti and Ferdinando Orsi for their excellent support in the annotation of the scientific abstracts. E-mail: {j.vanrooyen, d.novakova, o.calcinai,

Q: Export images with dates I've been trying to upload multiple images in the same directory as the code below. My folder contains the following files: 7-30-2015-image01.png 7-30-2015-image02.png 7-30-2015-image03.png 7-30-2015-image04.png 7-30-2015-image05.png 7-31-2015-image01.png 7-31-2015-image02.png 7-31-2015-image03.png 7-31-2015-image04.png 7-31-2015-image04.png 7-31-2015-image05.png 7-1-2016-image01.png 7-1-2016-image02.png 7-1-2016-image03.png 7-1-2016-image04.png 7-1-2016-image05.png 7-1-2017-image01.png 7-1-2017-image02.png 7-1-2017-image03.png 7-1-2017-image04.png 7-1-2017-image05.png I'm trying to use this code to divide the files by date. Getting date is easy by using the following: \$tam = strtotime(date("Y-m-d", \$uploadFile['timestamp'])); print date("Y-m-d", \$tam); After that, I need to loop from 1 to 365 and for each date it's easy
