Are you interested in new films, television programs, and music? A subscription to our video tape magazine.Q: Adding delay/refresh to sequential function in javascript I am currently making a config file for my website on which user can edit some settings. For every edit action I am creating an ajax request which will return a token, and store it in a server var. Then when the user change their mind, I am checking the token from the server, and if it is changed then I refresh the settings. I am wondering if there is a easy way to add a delay or an interval between each check? Also if there is a way to re-

---

apply the token (just in case it was changed by an user for testing). A: Here is a few ideas: 1) If you need to refresh your settings with a set interval, i suggest you to use a recursive function (for the checking the token).

```
function checkToken() {
$.ajax({ url: "", type: 'GET', dataType: 'json', success:
function(data){ console.log("success : " +
data.token); if(data.token == "your-new-token"){
//your stuff } else {
setInterval(function(){checkToken
```
