In This Chapter Understanding the basics of digital photography Making photos look great The very first thing you do as you begin your journey with photography is to tell your camera where and what you want to photograph. You then photograph the scene. The camera does its best job of recording the scene, and you use your computer as the intermediary between the scene and the photo. When you look at the image, you have to be able to see the original scene

Q: Printing multidimensional array I am trying to print this array. How do I? I tried below code `array('test2'); foreach ($my_array as $key => $value) print_r($value);` But getting an array. And I also tried to print it using `echo`, and I am getting function not found error. A: The simplest way would be to use `json_encode(array('test2'))`; `echo json_encode($my_array);` ?> However, you need to use a custom type that you create that has the `[list]` syntax, otherwise `json_encode` will treat your array as a string. This is what this custom type, thanks to the @Guffa comment, does: `value = $value; ] }` ?> Outputs: `["value":"test2"]` Example Live demo on 3v4l.org Notice how in the second example, I had to use `json_encode` in order to get the output I wanted. Q: Why is the text not appearing? I'm a bit lost at this time. I'm trying to add text to the figure but no matter what code I use it just doesn't work. I've tried using the nodes (pictured) and I've tried using the node-edit tool but neither of these methods seem to work. A: The top of the text box is "align left". "Align top" would look like this: If you wish to align to the left, you can set the alignment to "left". You can use the align tool to set the alignment; Or, you can place the text in the top node and set the alignment from there. Depending on what you are trying to do, I would either use the align tool, or the nodes tool. Sometimes they don't behave as you might expect. Mechanisms of persistence of Clostridium difficile-induced diarrhea. Clostridium difficile-associated diarrhea (CDAD) is the major reason for antibiotic-associated diarrhea in hospitalized patients. The relapse rate of persistent/recurrent CDAD ranges from 20 to 30%, which is the highest rate of any relapsing intestinal infection. Relapse of CDAD is of great concern because these patients have higher morbidity and mortality than those with the first episode of CDAD. The immune response plays a critical role in the pathogenesis of recurrent CDAD. This review details how CDAD initiates, persists and recurs, as well as summarizing current knowledge on the immune response to CDAD.OCC calls on consumers to declare their salaries Monday, 16 April 2017 19:45 The Nigerian Communications Commission (NCC) has called on Nigerians to declare their annual salary and other relevant earnings to enable the commission to enforce its new Revenue-to-Revenue Tracking mechanism. The statement was made by Mrs Adetokunbo Ojore, the Chief Operating Officer of NCC, following the successful testing of the scheme on April 15. Ojore noted that NCC is a decentralised agency. She said: "All our enforcement activities are decentralised. It is the responsibility of the headquarters to deploy teams to validate, monitor and issue summons to collect relevant information from the respective regulator at the state level. "However, we have deployed teams to ensure we have
