In FIFA 22, on-pitch animations and AI are every bit as robust, detailed and complex as FIFA 21, with new animation tools built on the new character and AI traits system, Control DNA, created to enhance player control and reactions to challenges. "FIFA 22 is our most technically complex title yet," said Jeffrey Webb, Executive Producer on the game. "We've introduced deep new gameplay innovations like the ability to deploy and shoot, new visual effects like flares, smoke grenades and more. But the coolest new features are those that can make gameplay more intuitive and engaging for players." Players will have the ability to deploy the ball into the air by kicking, jumping or shooting. This allows them to play creative individual moments and surprise their opponents, adding a new dimension to their gameplay. FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay.
