Recent years banking clients have a great variety of applications on their computer screens; this makes a difference not only in the way users interact but also in the identification of applications to the users. Particularly, during the last years, financial institutions have developed their own software applications in order to integrate the accounting and management aspects of their own businesses. Among them, we find: Banking software, Mobile banking software, Mobile phone banking software, Online banking software and others. These applications have their own design style but are always recognizable to users who have experienced in particular applications. From this fact, the idea of this set was to design a bank set, that could work as a good graphic reference for any type of software application in the banking sector. Key Features: It is possible to mix and match one icon from the set with any kind of other SVG file; you can just mix your file icons into the canvas and arrange to them as you like. You can use the icons in flat color versions, in an image map (useful for web browsers) and as a SmartObject (for use with Adobe Illustrator and Photoshop). A layer mask will allow you to create a more interesting effects on them. There is a set of SVG icons included in the same size. You can download and use this set for free, no attribution required. All the icons in this set are part of the IconFolk collection, therefore you can use them with your own projects and personal creative work.
