
BlueSoleil USB Dongle Drive V1.6 2021 Download

I recently purchased your USB dongle, but to my dismay I suspect it was... 'about Bluetooth' the details say: Product Version : BlueSoleil 1.6.4.0. ~ (I currently have 3.3.0 installed) and I would like to know how I can add this information to my list so that I can use it with software like Nokia PC Suite. I don't want my bluetooth system to just work, if i use a program i want to know what it is using. So I can see how it works, not just once when I need to. Maybe it can be done with a "debugger"? Am I missing something?
